. The infographic, titled Iconic Signs in the United States, shows just that—some of the most renowned and recognized signs in the country. Information is included on the Hollywood sign, Times Square, the Disney World sign, and more.

According to the press release, Blue Pond Signs put together the infographic as a way to show the lasting value of iconic signs, as well as to cultivate inspiration: "We wanted to show the creativity and history behind memorable and iconic signage that we use as the creative juice behind the creation of our custom signs and logos," said Ken Miller, president of Blue Pond Signs. "We thought our customers would enjoy the innovation and study of the icons that drive countless visitors to key locations throughout the U.S. as they seek to bring consumers to their doorsteps with visual flair and appeal."

You can take a look at the infographic below. Let us know what you think, and if the iconic signs of the US have inspired your own work in any way.
